

German-Italian b2b meetings at Automatica

From June 19th until June 22nd, Munich is host to the annual Automatica trade fair, the leading Exhibition for Smart Automation and Robotics.

On **June, 21st**, ITALCAM together with the Bavarian Cluster Mechatronik & Automation (Associated Partner of BIFOALPS project) and CRIT from Emilia Romagna will organize a German-Italian business pitch where companies from both Bavaria and Northern Italy come together at the fair.

Companies from both countries can get to know each other and engage in active networking and b2b talks through pitching rounds, supported matchmaking talks and a guided stand tour.

Within the NUCLEI and BIFOALPs projects, the round table of Bavarian and Italian companies serves to highlight common grounds in automation technology and strengthen the transnational relations between the industries in both regions. The traditionally good bonds between the regions in the fields of machine engineering, electronical production and automotive sectors offer a good opportunity for a sustainable macro-network of participating companies.

13:00: Welcome: Alexander Schäferling, Cluster Mechatronik and Automation

13:05: BIFOALps project: Martina Agosti, ITALCAM

13:10: NUCLEI: Short Project Presentation, Andrea Ceci, CRIT (LP)

13:15: Italian Company Pitch

13:45: Dynamic German Company Pitch - stand tour

14:45: Coffee break

15:00: Time for guided b2b talks

17:00: Networking Dinner
